To understand the significance of the internet in terms of commerce and sales,
today and in the future, you must ask yourself **5** simple questions.

What is a marketplace and why is hot-s-hot so important for the future - for commerce and sales? 5 questions - 5 answers:

A marketplace is a meeting point for people, businesses, products, customers
and sellers, who are present at this one place to show off, buy and sell.

Back then, the marketplace was at the town square, the city center or next door….
If you weren't there, you had nothing to offer or sell and didn't buy anything.

Modern marketplaces are now online! Customers and sellers are all going online!
This is why you should have an online presence and also sell online!
The internet is the marketplace of the future!

1st question:

Where is your marketplace? Where is your marketplace in the future?
When you don't have an online marketplace - you can't sell anything online!
Or in other words….

If you're not online, …you're offline!

Everyone who participates in an online marketplace shows what they have to offer.

If you still show nothing online and sell nothing online,
then the services and products that you offer and customers are looking for,
will be offered by other online sellers who have a presence, show off and make sales!
The others are doing business online - You are not making business online?
It's this simple!
The online marketplace is the marketplace of the future!
Where will you sell your products in the future?
Everyone is online!!
If YOU can't be found online, YOU can't sell online!

And that's exactly why hot-s-hot is the perfect solution!
hot-s-hot brings you into the INTERNET and gets you online!

2nd question:
Where is your marketplace? Where is your website? Where is your shop?

Do you have a website? Do you make sales on your website? Do you have a shop?
Either you have a website and painstakingly build your own online shop,
which is very time consuming, expensive and really difficult!!
or
you don't have your own website? That's fine too!
or
you take the easy route and start participating in the already completed
Internet - Marketplace hot-s-hot and use the already existing online infrastructure
to place your business online and become visible to potential customers.

The easiest and cheapest way to do this is with an account at hot-s-hot.com,
- because you don't have to do your own complex programming and maintenance!

The only effort you will have in the beginning is:

- Upload and describe all your online products precisely with text
  so that your customers know what they're ordering and what they will receive.

- Take and upload good and informative images of your products,
  so that your customers can see the product. It makes selling easier!

- Set an acceptable price. Not to cheap but also not too expensive.
  The product should have value at a fair price.

- Always provide truthful statements about your products.
  Whoever lies about their product does not only deceive others but also themselves!
  Describe your product in a good and honest way.

- hot-s-hot gives you the option to specify your country's currency.
  Select the correct currency.

- Describe when and how you plan to deliver the product. Include packaging costs and
  shipping fees as well as an estimated delivery date.

- The better you describe your item for sale, the more time you'll safe yourself in your
  daily work, as all the customer questions will be answered in advance by your clear and
  concise product description and the product information will be easy to find.

  For yourself, for your order, for your employees and for your customers!
  Describe your product properly! It is important!

3rd question:

Are you selling alone? Are you waiting for customers? Do you want more contacts?
Nobody is alone at hot-s-hot!
You're in the middle of a marketplace!
hot-s-hot is a marketplace where every seller and account owner is
a member of the hot-s-hot-Group.
All members have the same goal in mind - sales!
Just like a marketplace, a supermarket or at a shopping center
- where you have many small shops and businesses.

When you're not inside the shopping center and just sit outside the door,
So not inside the „online-marketplace -shopping center", then you will have
More difficulty selling your products!
With hot-s-hot, you and your business have the chance to be available, immediately and always, 24h. online, around the clock, in every place, in every city and worldwide, to show your products and services to your target audience and make sales!

And for your products and services. Not only do you advertise for yourself,
but also for the community, for the marketplace hot-s-hot. Everybody does!
Everybody is profiting!

Additionally, hot-s-hot is advertising with social media for the marketplace
and for every seller and their products. **hot-s-hot advertises for you too!**

hot-s-hot offers **4 shop areas = Areas**:
DATING - PROPERTY - MARKET - VEHICLES - all in one online marketplace!
Your customers can find everything on one website! That's a giant advantage!
You can show off and sell everything on just one single website!
You don't have to manage all your products over 3 or 5 different marketplaces
when you have everything on one single website!

hot-s-hot is the big supermarket shopping center among the online marketplaces,
Where customers and find anything they want and vendors can sell anything!
a) for private sales of all kind **(PRIVATE)**
b) and for professional retailers, sellers and vendors of all kind! **(BUSINESS)**

100% of the price that you have selected for the product will make its way to you.
The buyer pays you - directly!
There are no subtractions! You sell directly to your customer!

4th question: - The philosophy of hot-s-hot.

What is hot-s-hot.com? What is success? Why are sales important?

hot is energy**, s**uper **hot = ** a whole lot of energy! Hot = heiss.
A **shot** is… well… a shot. A message! An offer! An attempt! Success!
A **shot** is also a picture or photo = photo-shooting!

Take good photos of your products. Show what you offer and what you sell!
Take hot pictures of your hot products!

Don't sell boring stuff! Put your products into the spotlight!
Do a hot photoshoot of your products, of your inventory,
so that your customers get attracted to your products and you make the sale.
Your hot product becomes a hot-s-hot- product! To a hot price!

A shot has to hit its target! A hot shot is = a hot deal!
„making a deal", „using a hot offer", or
„buying a hot product"! That's a „hot shot". = hot-s-hot.

Success defines hot-s-hot = Communication / Selling a product from A to B.
Successfully communicating generates sales! Who communicates makes sales!

Objects are either profiles or products. They are separated in:
- thinking / acting people / providers, they have a = **PROFILE** or
- not thinking / not acting / products/services, those are = **PRODUCTS**.

hot-s-hot.com is an online-platform and shows PROFILES and PRODUCTS,
for everyone who communicates and takes part in everyday life with
- **PROFILES** to take part in thing, offer services, make contacts or

A successful business will use every chance to make money!

When you register as a seller with hot-s-hot to create
PROFILES and PRODUCTS and show them online on our marketplace,

hot-s-hot was developed by marketing experts which much over 40 years of experience in advertisements and successful sales and is available on the internet since 2026 under the address www.hot-s-hot.com.

Behind hot-s-hot are people, businesses and companies with products that are being offered and sold. This marketplace was made for you and you shape and use this marketplace. **It is your marketplace!**

To understand the true size of hot-s-hot zu verstehen, you need to understand why this is and why hot-s-hot was designed this way:

People and businesses can take part in hot-s-hot, who…,
- Are unregistered and just visit hot-s-hot, … or …
- Are registered to be successful.
  Private or for business, behind every company are people,
  who have PROFILES and want to show, offer and sell PRODUCTS.

We have separated different groups of people (P1 - P9) into 4 groups:

visitor (no account - P1) They just visit hot-s-hot, no registration.
customer (no account - P2) sometimes buys on hot-s-hot, no registration.

seller (private account - P3) buys/sells for 3 months. 1 product with registration.
seller (private account - P4) sells for over 3 months, with registration.

profiseller (has 1 business account, seller - P5) many products, long runtime
profiseller (has 2 or more business accounts - P6) otherwise like above P5

supporter (freelance-seller with DC*- P7) has business account, agent for hot-s-hot.
supporter (profi-agency with DC* - P8) has business account, trainer for hot-s-hot.
DC = DISCOUNT-code - P9) is profi-agency as CITYseller with DC.

Successful people are winners! As a seller, you are a winner!
You win more with hot-s-hot - you are more successful with hot-s-hot!
As a seller, you are already selling what you have been selling before…,
More or less successful! You have nothing to lose! Except for time!
It can only get **better** with hot-s-hot.com! **You can only win!**

To be „better"…so, make more sales, you will have to be able to take all of your chances! **Who makes more sales is more successful!**

Part 1) Introduction of the 4 areas of hot-s-hot:

As you have already notices, hot-s-hot has 4 areas of sales.

- DATING - here are **private PROFILES = PRIVATE** and no products!
Profiles are people or businesses introducing themselves to to find new, interesting contacts and offering themselves for sports, partnerships, relationships, friendships, hobbies oder job search, profession and business. And much more.

DATING also has professional **business PROFILES = BUSINESS.**
Here are people who have multiple profiles or looking for contacts
- like job offers from businesses and private people,
- or businesses looking for professional workers
- or people and businesses looking for a new job
- or people and businesses looking to offer their services.

DATING lets people connect with each other - so „private to private“ but also „private to business“ or „business to business“ contacts can be made.
DATING means having a DATE, a meeting or an appointment between 2 parties, which can be of private nature - but also of a business nature.

- **PROPERTY - MARKET - VEHICLES** have **PRODUCTS** that can be placed in all areas in various categories and sub-categories.
  Too many to list them all here!
  It’s best to take a look yourself!

All profiles and products have a lot of space for you to create an extensive Profile- or product description. Photos, suggestions, ideas and prices are easily uploaded and edited by you.

You don’t need any programming or computer experience!
Product creation is set up the same way in all of the areas, making it easy to use for every user and you only have to learn the process once!

All 4 areas allow the creation of one product or profile for the duration of 3 months, for you to test out the process and learn all the functions and advantages of hot-s-hot, **Completely for free!**

Become active and start now -
By creating PROFILES and PRODUCTS, you generate new CUSTOMER CONTACTS!
Build and place your profile and your product online, so that customers can find you.
Receive 100% of your earnings by selling your product online!
Create your product online and sell it; that’s the platform hot-s-hot offers you!

Part 2: hot-s-hot is big and becomes giant! A simple way:

Everything works online - just like offline!
You make contacts, you communicate and you show what you have.
To generate constant sales - you have to constantly show your products!

The shortest runtimes with hot-s-hot are 3 months. That's not a lot of time to win new customers. 6 or 12 months of runtime is good, but long time business success is only possible with 24 months of runtime or longer.
Your online presence must be built first, after all!

Think long time and set yourself a clear goal!
3 months are too short to build a sustainable business!
Nobody would open an actual, physical store for such a short time, only to close the business down after just 3 months. That would not be smart.

The initial investment is too much to think short time and it's just wrong, business wise!
Build your own online business step-by-step!
Because every business has to be built; cared for and expanded daily!

It might be possible that, for a private sale, the listing time for a free PROFILE or PRODUCT over the course of 3 months could be enough.
Most of the time - when the prices for the product is extremely low.

But whoever wants to take part in this marketplace commercially, should upgrade their PROFILE or their PRODUCT and book a long time **private account** or a commercial **business account**, which is pretty cheap!

Your person, your job search, your employee search or the sale of your house, car, boat, trucks, bicycles, your apartment or rocking chair can be done with a relatively cheap long time account!
The longer the runtime, the cheaper it is per month!

By having a longer account runtime, longer than 3 months, the you don't have to delete and recreate your product listing - that would be too much work and would take too long! hot-s-hot has cheap offers, especially for long online advertisements !
It's always favorable to select a runtime with a good value!

Which account would be the best?

If you think profit-oriented, like a true businessman, or like a success-oriented business and you want to start actively building your presence, then go ahead and turn your **private account** into a **business account**!

Save money and time and profit immediately from having a cheaper, long running business account.

Our tip: Start slowly by creating 10 or 20 products and start learning how hot-s-hot and how you place products on your account.
You can upgrade your account later to add 50, 100 or even 200 products to your account.

The more products you have online, the more products you offer and the more products you sell!
You can scale your account effortlessly and adapt it to your commercial needs, time wise, in the runtime of your business account and by the amount of products that you want to sell at the same time.

Similar to how you can scale and expand your offline store, you can expand your online marketplace to offer and sell more products!

You have way more commercial opportunities with a **BUSINESSaccount**, which also allows you to fully interact with the entirety of the marketplace!

You are a true online seller with a BUSINESSaccount!

You will read more about that later!

Check which user group you belong to.

To understand your position in the hot-s-hot- ecosystem, it is important to know, in which **P1 - P9** user group you are in and where you want to place yourself on hot-s-hot.
Do you want to be a PRIVATEseller or a BUSINESSseller?

The contact from customer (P1/P2) to seller happens via telephone, Messanger apps or the address and name, If the seller allows address and name to be visible. The seller decides which contact information is visible to make contact with them.

P2) the visitor, who can use free registration to become a Customer.

You decide who you are. hot-s-hot will support you on your way!
The Foundation for the first step into Online- BUSINESS starts with a free registration at hot-s-hot.

It is important that, when your first register your account, to know and understand the different Name-LEVELS:

Please learn it now - only then you are prepared to us hot-s-hot perfectly.

LEVEL1 is the first and last name (family name) of the person, who created the account. This is the LEVEL1 person and has the highest LEVEL during registration, because this person registered the account with us and is the main contact for all future decisions!
LEVEL1 is the ACCOUNTowner! LEVEL1 is the Boss!

LEVEL2 is the NICKname of the Accounts!
At log in, when you go online, for the Shop, without revealing the real L1 name. **L2 makes you anonymous!**

In some business models it's quite usual to only show the NICKname as identification, for example, to hide and protect the owners real name.
You decide! LEVEL1 makes the decision about the L2 **NICKname of the account**.
L1 decides what characters to use! Numbers, letters…you decide!
You can also use the LEVEL 1name as your LEVEL2 name, you decide!
But that makes your actual name visible to everyone when you go online!
Usually LEVEL 2 us used for a short **NICKname**.

LEVEL3 is the company, the business or the corporate name, if the account belongs to a commercial business. If your business is using the account, enter the business name in L3.
It can also be the family name, if it is a family owned business, with all details, just as marked in L1. You decide!

If you edit your account later, L1 will decide if the L3 name is being shown or not gezeigt
You can also select the L3 name on the individual products!

L1 decides if there is just the L3 name or if there is a L4 (the salesman).
Or is just L4 going to be displayed? Or is L3 going to be displayed next to L4? You decide!
This function can be important, when you have a sales employee or other employees handling sales!
Even freelancers and contractors can use the L4 name, if you allow that as the L1/L3. Usually L3 is higher in the hierarchy than L4.
L3 could be the owner - but **L4 is always the salesman!**

L3 can be identical to L4, then the product will only show L4.

LEVEL4 is the salesperson!
L4 is the person of contact, who is responsible for the product.
L4 is the person who is doing the sale and the one who communicates to the customers, therefore L4 has the most contact information available.
L4 is the key to the sale.
L4 can be the owner (L1 or L3) or a salesperson,
who is directly responsible for the sale!

LEVEL5 is the L5 SUPPORTER- Person.
There can be two LEVEL5 Supporter at maximum.
L5 is usually the person, who created the profile.
L5 could be an employee / salesman in your business.
L5 could also be an external Supporter, who helps you with the creation of products.
L1, L3 or L4 don't always have to be the one to upload products.
Sometimes it is done by the L5 Supporter.
Accounts, profiles and products are sometimes created by L5 users,
who are good at texting, taking photos and have a good idea of fair pricing.

In order to create good products, it is necessary to create good pictures, a good description and to formulate the text well, and also to correctly create, for example, the pricing or the detailed description and the address (and possibly the later social media).

A well-written profile or profile is very important for the success of the company, subsequent marketing, and the sales process!

Therefore, the L5 person is an important person, who is familiar with all the details of the product, its placement and the formulation of a the sale.

Be careful who you assign L5 to!
The L5 person must be a person who has your trust!!!
Because the L5 person has access to all your account data!

LEVEL6 is **only needed for dating** and is the special **NICKname of a person,** who does not want to reveal their original name or L1 or L3 names **in the DATING section**. LEVEL6 uses a NICKname to protect your real name!
For DATING, it's better to start with using a L6 NICKname. Only use your real name,
If you are sure that you have found the correct partner and that you can trust them.
Always be careful!

After completing the registration for your company (L1, L3, L6),
you can open one or more accounts with products in the respective areas.
L4 and L5 are only filled in during product creation!

To be active on hot-s-hot, you must have an account;
you must first register as an L1 and create an account name!
When setting up and registering the account, the L1 can assign different login passwords for the account name:

L1: The password for the entire account (master password).
L5.0: The password for the "SUPPORTER" (L5)—this user has access to almost everything.
L5.1: The password for the "SELLER-Supporter"—with restricted rights.
L5.2: The password for the "ARTIKEL-Supporter"—authorized only to create items/articles.

A "SUPPORTER" is an individual who assists the L1 in setting up the account, shop, or items.
There is no guarantee that an L5 user is trustworthy!
Over time, an L5 supporter might change, which is not ideal for the L1!
Therefore, the L1 area must be protected by a password—a crucial step!
L1 serves as the master password for the entire account and shop!
Within the "**My Account**" section, the L1 can assign three additional passwords for L5, L5.1, and L5.2, effectively limiting their access levels!
This is extremely important!! The L1 decides who has what level of access!! Here is the breakdown:

L1 = Master password (the L1 has full control and is the absolute boss!)
Only the L1 can assign the L2 account name and the DC password!

L5.0 = The L5 user has full permissions, with the exception of upgrading or deleting the account, or modifying the L1 credentials!
Designated as "SUPPORTER."
An L5 user can place orders for SS or M8M, but only the L1 can authorize payment!
An L5 can view, select and reserve ADplaces but only L1 can authorize payment!
